

AgroChimInvest

About company

"AgroChimInvest" LLC is one of the leading Russian companies specializing in growing, processing, refining and exporting of agricultural products such as coriander, mustard, flax, chickpeas, lentils, peas.

The history of the company begins in 2003 with the production of high-effective chemical crop protection agents for agricultural production. Over 17 years, we have gained tremendous experience in developing our own technology for crop protection by our leading agronomists, registered more than 40 trademarks, conducted a large number of experiments in the fields, expanded the geography of regular customers throughout the country. All this served as the opening of a new export direction in the company in 2015.

Company history

2015

Launch of the project. Getting the status of Gold supplier. First export shipments.

2016

Expansion of production. Purchase of equipment and beginning of independent cleaning of goods. Creation of own company website.

Tons of shipped goods

Our production

Our production facilities are concentrated on the farms, located in Krasnodar region. During collecting, cleaning, storing and packing of various seeds we use only modern domestic and foreign equipment.

Our indisputable advantage is its own management and production site

On the grounds of the complex are located warehouses and modern equipment to meet growing technologies in the fields of coriander, as well as a high-tech infrastructure for various types of seeds cleaning, packing and shipping of finished products.

During the entire cycle of crop growth in the fields, their condition is monitored by qualified personnel of the company, adjusting to each treatment in time.

All goods are delivered by own transport to the terminal and shipped to customers on CIF and FOB terms from the ports in Novorossiysk.

All products of the company undergo laboratory research and certification, allowing constant monitoring and approval of the high quality of each crop.

Participation at Gulfood 2020

From February 16th to February 20th, our team of professionals held meetings at their own part of the booth as part of the collective exposition "Made in Russia" in Dubai (UAE).

Our products

Our products

Coriander seeds

Quality indicators

Cleanliness: about 98-99%
Halves: less than 5%
Moisture: 8-10%
Color: Golden-Brown
Harvest of actual year
